📍 Erode, Tamil Nadu, India

Career Objective

Motivated graduate with a strong foundation in software development and problem-solving, with hands-on experience in building real-world projects and applying technical concepts effectively. A quick learner with a collaborative mindset and adaptability to new technologies, seeking an entry-level opportunity to contribute while continuously developing professional skills.

Skills

Languages: Java, Python

Backend: Spring Boot, Hibernate, REST APIs, JDBC

Database: MySQL, PostgreSQL

Tools: Git, Postman

Concepts: OOP, JWT authentication, MVC architecture

Participation

- **Presented** a paper on "Dynamic Behavior of High-Speed Gears with Active Vibration Control" at IIT Madras
- **Presented** a paper on "AED Drone System" at Ideathon, KEC

Achievements

- Won 3rd Prize in FABEX (IEEE, 2023)
- Secured 3rd place in district-level Silambam tournament

Education

B.E Electronics and Communication Engineering
Kongu Engineering College
CGPA: 8.42 | 2021-2025

HSC

Erode Hindu Kalvi Nilayam Matric Hr. Sec. School
Percentage: 81.67% | 2020-2021

SSLC

Reliance Matric Hr. Sec. School
Percentage: 73.4% | 2018-2019

Projects

Job Portal - Java Backend Development

Java, Spring Boot, PostgreSQL, Rest APIs, JWT

- **Developed** a backend Job Portal enabling **job posting, search, and application workflows** for multiple user roles
- **Built** scalable **RESTful APIs** using **Spring Boot** and implemented **JWT-based authentication** for secure user access
- **Designed** and optimized **Database** for efficient storage and retrieval of **user and job data**

A Node to Node Access Control for Device to Device Communication

Network Simulator (NS3), Bonn Motion, Net Anim

- **Developed** an access-control algorithm to enhance **Device-to-Device (D2D) communication** in **IEEE 802.11 networks**
- **Optimized** channel utilization using **dynamic backoff strategies** and **MIMO techniques**
- **Improved** network performance by **reducing latency** and **increasing throughput** in high-density environments

Wireless Power Restore Alert System

Arduino Nano, RYLR896 LoRa, Relay, PCB Board

- **Developed** a portable **LoRa-based alert system** to notify technicians when grid power is restored
- **Designed** a transmitter-receiver setup with **automated buzzer alerts** for immediate response
- **Enhanced** operational efficiency by **reducing generator overuse** and enabling **real-time notifications**

Languages

- English, Tamil
